

Tarique Anwar

Java Backend Developer

PROFESSIONAL SUMMARY

Results-driven Java Developer having worked at Salesken.ai as a Tech Intern (Software Developer) developing high-performance micro-service, REST API and integrating them with frontend using Java, Springboot, JSP, Servlet, HTML, CSS, Javascript, jQuery, and PostgreSQL. Also, been through a 35-week intensive and immersive Web Development bootcamp to gain proficiency in Software Development. A highly motivated, fast-learning individual seeking a challenging, competitive, and collaborative Java Developer role.

PROFESSIONAL EXPERIENCE

Tech Intern (Software Development) Mar 2023 - Present
Salesken.ai, Bengaluru

- Developed a micro-service that focuses on analyzing sales representatives and their team's performance, generating accurate reports.
- Accomplished a seamless and successful migration of the database, transitioning it from the ELK stack to PostgreSQL.
- Collaborated with the QA team to identify and troubleshoot bugs in both the frontend and backend, ensuring their timely resolution.
- **Tech Stack & Tools used:-** Java | Servlet | JSP | SpringBoot | AJAX | HTML | CSS | JavaScript | PostgreSQL | JDBC | Eclipse | Git | GitHub

Senior Technician, Technical Support Nov 2021 - Apr 2022
Dell International Services India Private Limited, Gurgaon

- Handled incoming calls from customers with Premium Support warranty to troubleshoot and fix the issues in their computers on call, if the issues were software issues.
- Created dispatches for hardware-related issues.
- Completed the case logs for each call.
- Followed up with customers to confirm if the issue was fixed.

PROJECTS

CabWay | 

CabWay is a Restful Webservice that can be used as an Online Cab Booking Management System. The users of this service can be customers, drivers, and admins. This is a collaborative project built in a span of 5 days.

Features:

- Login and Signup for all users. Each step requires validation.
- Admin Module:- Register and delete driver | Check bookings | Assign a trip to a driver | Cancel trip | Update trip status.
- Customer Module:- Register or delete account | Book a trip | Check booking history | Check assigned driver | Rate a driver | Cancel a trip.
- Driver Module:- Check assigned trips | Update trip status | Generate bill | Check all trips history | Update cab details | Check ratings.

Areas of responsibility:- Built the Login & Logout using simple validation with the help of session tokens and the Customer Module.

- **Tech- Stack :-** Java | SpringBoot | MySql | Hibernate | Lombok
